Edited by Henk A. Becker, Former Professor of Sociology, Utrecht University, The Netherlands and Frank Vanclay, Professor of Rural Sociology, Tasmanian Institute of Agricultural Research, University of Tasmania, Australia

‘An innovative collection which takes social impact assessment to the frontiers of and social policy and citizen awareness. Unusually, this collection includes both sophisticated quantitative tools and equally important chapters on participation, stakeholder involvement and environmental mediation. A most valuable source book.’ – Michael Redclift, King’s College, London, UK

Social Impact Assessment (SIA) is the process of analysing and managing the intended and unintended consequences on the human environment of planned interventions (policies, programmes, plans, projects) so as to bring about a more sustainable and equitable biophysical and human environment. This important Handbook presents an indispensable overview of the range of new methods and of the conceptual advances in SIA.

Recent increased attention to social considerations has led to substantial development in the techniques useful to, and the thinking in, SIA. A distinguished group of contributors provides an up-to-date and comprehensive account of the cutting-edge in SIA development.

This Handbook outlines a new understanding and definition of SIA and, as such, will be an invaluable reference tool for both practitioners and scholars at different levels working in the fields of SIA and environmental studies (including both impact assessment and management).

Contents: Preface Part I: Conceptual Advances in Social Impact Assessment Part II: Methodological Approaches for Best Practice Index
